Alja-Safe® BREEZE

Liquid Alginate for Lifecasting

NEW!

**The World's First and Only
Liquid Alginate (Patent Pending)**

Alja-Safe® BREEZE is the world's first non-powder alginate concentrate that yields pourable lifecasting molds that are virtually bubble free. Liquid BREEZE is perfect for making single-use pourable molds of hands, feet and other body parts.

Major Advantages of Alja-Safe® BREEZE:

- No Residual Dust When Mixing and Pouring
- Easier to Mix Compared to Powder
- Will Not Stick to Most Surfaces
- Crystalline Silica-Free
- Skin Safe

Castings Can be Made From:

- Platinum-Cure Silicone
- duoMatrix® NEO
- Smooth-Cast® 300Q Resin
- Plaster
- Wax
- Clay

1. Dispense
Liquid BREEZE

2. Dispense
Water

3. Combine Liquid BREEZE and Water
into a Larger Mixing Container

4. Mix thoroughly

5. Submerge body part into
mixture and allow to cure

6. Liquid BREEZE captures
perfect detail
